## Our In-house Laboratory

## VIP & VVIP Recovery Suites

# Step-by-Step ICSI/IVF Journey

1

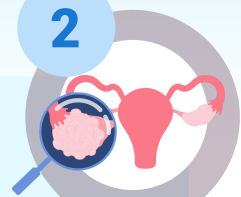

Day 1-3 of Period

## Consultation & Fertility Pre-Screening

Begin with an initial consultation and Fertility Pre-screening. Our specialists assist to design a personalized treatment timeline based on your medical background.

2

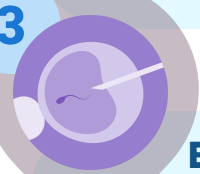

Day 2 Onward

## Ovarian Stimulation

Patients will receive hormone medications to stimulate egg production, monitored closely with ultrasounds TVS and hormone testing to optimize egg quality and quantity.

3

Day 14

## Egg & Sperm Collection + ICSI + PGTSeq-A

Eggs and sperm are collected on the same day. Using ICSI, a single healthy sperm is injected directly into each mature egg. Embryos are then screened with PGTSeq-A to select the healthiest embryos.

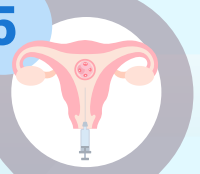

4

## Embryo Freezing

High-quality embryos are frozen using advanced vitrification techniques to ensure future flexibility and maximize success.

5

## Frozen Embryo Transfer (FET)

When your body is ready, the embryo are carefully thawed and transferred into the uterus under optimal conditions for implantation.

6

Day 10 after FET

## Pregnancy Test & Follow-Up

About 10–14 days after embryo transfer, a blood test confirms pregnancy. Our team continues to support you through early pregnancy and beyond.

# Our Patients

We are truly honored to have walked alongside hopeful parents from around the world. Each journey is deeply personal, and every smile, every baby, is a heartfelt reminder of the trust placed in our care.

## Frequently Asked Questions for International Patients

**How long we need to stay in Thailand for ICSI/IVF?**

The entire IVF process, from ovarian stimulation to frozen embryo transfer, spans about four months. You'll need two trips:

- **First trip (Egg Retrieval):** After 10-12 days of stimulation, stay 4–5 days in Bangkok.
- **Rest 2 months** at home country for uterine preparation.
- **Second trip (Embryo Transfer):** Stay 4-5 days including check-up, implantation, and post-care rest.

**Can I freeze my eggs or embryos for future use?**

Yes. We offers advanced cryopreservation services for both eggs and embryos, allowing you to preserve fertility and return for treatment when you're ready.

**Can I freeze embryos and return later?**

Absolutely. Many patients choose to freeze embryos and return months later for implantation. We maintain secure long-term storage and offer flexible scheduling to accommodate your plans.

**What documents are required?**

- Passport (Both Partners)
- Marriage Certificate
- Medical History Record (If Available)
