Success You Can Trust

2022 marks a very special year for SAFE FERTILITY GROUP as we celebrate our 15th anniversary. This is also a very special year because we will go IPO (Initial Public Offering) as well as a year of good news for everyone around the world as Covid-19 Pandemic is being resolved.

SAFE was officially founded in 2007. We had a big dream when we started SAFE and we made this dream come true by turning them into execution. What we have achieved is far beyond my and our wildest dreams when the long journey initially started; we have been working with passion, resilience, boldness and perseverance for all 15 years.

Along our journey, we continued to implement significant innovations and they became the first in many aspects in the industry such as the first aCGH, NGS, EmbryoScope/EmbryoScope Plus, Karyomapping, NIPT (CE-IVD), Robotics and artificial intelligence in Thailand. We also are the first IVF Center in Thailand that is RTAC accredited.

We aim to serve patients both international and domestic and continue to do so where we have opened 5 clinics across Thailand. In 2015, we founded Next Generation Genomics Company to serve genetics and genomics to hospitals, clinics and laboratories all over the world.

It's about the people

To our employees: I am grateful for the opportunity to work with passionate, dedicated and innovative people every day. You treat our patients as family and take care of them with a heart full of compassion.

To our customers: Thank you for putting your trust in us as our slogan "Success you can trust," mentions. We commit to work relentlessly to make your dreams come true.

To our stakeholders: Thank you for your continued support to SAFE, we hope to continue to build a relationship of trust and success together

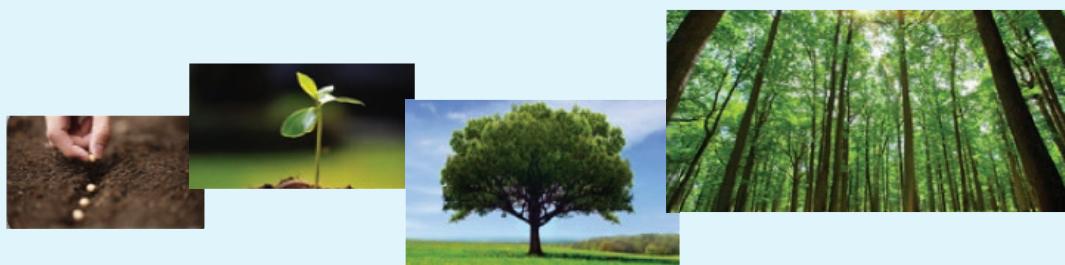

To our partners: To be in business for 15 years, we recognize the importance of establishing collaboration with our partners. We will work and grow together to serve our patients and community better.

New Chapter

This year, we aim to be a listed company in Stock Exchange of Thailand. We are all prepared to make this real. With IPO, SAFE will be a high-standard organization with better infrastructure and better public image.

The journey has not been easy. It takes courage, passion and perseverance. The world population crisis is gradually taking place as birth rate declines, We are committed to help to solve this crisis and shape the future together.

Wiwat Quangkananurug
CEO and Founder

Congratulations letters

สารแสดงความยินดี

Mr. Amnuay Preemonwong

Chairman of the board of Directors

I would like to take this opportunity to convey my warmest congratulation on SAFE Fertility Centers 15 years' anniversary. Especially to Dr. Wiwat Quangkananurug on his well deserved success and achievement.

With his vision, dedication and hard work of all those years, SAFE Fertility Center today has accumulated a wealth of know-how, a group of specialist doctors, the best in this field and the whole supporting and managing team, all of which has a customer-oriented care in mind. It is well received not only among Thais but also international clients.

Despite this difficult year of COVID 19 pandemic, many companies, home or abroad are facing a tough time to operate. With Dr Wiwat' guidance, Safe Fertility Center has prospered even more whilst maintaining their high standard.

Lastly, I wish the company, Dr. Wiwat and Safe Fertility Center team a continued prosperity and earning many achievements for many years to come.

Prof Juan Garcia-Velasco

Director

IVI RMA Madrid, Spain

Fifteen years can be a lifetime for a teenager or time period where you move from your last days at the University to be an established professional. In ART and IVF, fifteen years may mean a huge myriad of changes in ovarian stimulation protocols and very specially in IVF laboratory technology. In fact, we all have witnessed a huge improvement in IVF results in these past 15 years. And by improvement, I mean not only increasing pregnancy rates, but also very relevant reduction in complications, with very low multiple pregnancy rates, with almost non-existent ovarian hyperstimulations rate, with friendlier and shorter protocols for patients, making altogether a little easier the journey of fertility to our patients.

I would like to congratulate SAFE Fertility Center and Dr. Wiwat Qunagkananurug for leading this group in these 15 years of existence with a clear vision as a Medical Director offer the best clinical results for their patients with the lowest complications possible. This has been possible thanks a clinical leadership focused on quality and technology, in training and investing.

It is a real pleasure to see where they are today and would love to see where they will be in 15 years from today.

Howard Carp, MB, BS, FRCOG
Professor of Obstetrics and Gynecology
Sheba Medical Centre, Tel Hashomer, Israel
And Tel Aviv University, Israel
Honorary Clinical Professor
University of Nicosia, Cyprus

The Safe Fertility Group is celebrating the 15th anniversary of their founding.

The group's progress since 2007 has been astounding.

From humble beginnings to five branches throughout Thailand.

"Safe" is undoubtedly Thailand's leading fertility centre. Under Wiwat Quangkananurug's medical direction, the group has expanded to take on all advanced forms of assisted reproductive technology.

Wiwat and I have often collaborated for the patients benefit. I have always been impressed by the standard of clinical excellence. Research has included the detection of mosaicism in trophectoderm biopsies, the transfer of mosaic embryos and NIPT for diagnosing thalassemia.

I am certain that the next 15 years will be as fruitful and rewarding as the last 15. Congratulations on your past achievements, and my very best wishes for your forthcoming achievements.

Howard Carp

Luca Gianaroli
Scientific Director of S.I.S.Me.R.

I would like to congratulate Dr. Wiwat Qunagkananurug for his impressive achievements over the last 15 years.

His clinics and his staff provide a high quality service to patients from Thailand and the neighboring countries, offering a wide range of techniques to help them solve a variety of reproductive issues.

One thing I particularly appreciated about his philosophy is the attention to innovation in the best interest of patients. In this respect, we share a vision according to which research plays a vital role in ensuring safe and effective treatments and that is reflected in our clinics' activities.

In early 2016, blastocoelic fluid biopsy for PGT purposes was a trailblazing technique. Encouraging preliminary data had been published by S.I.S.Me.R. only few months earlier, in 2014. Nevertheless, blastocentesis seemed to have a major potential as apparently it allowed a quite accurate and safe diagnosis reducing embryo manipulation, costs for the lab and ethical issues for the patients.

Dr. Qunagkananurug realized that this innovation could be beneficial for PGT patients and he sent me an e-mail asking me to organize a workshop for clinicians and embryologists on this subject in Bangkok. We subsequently met at the IFFS congress in New Delhi and we made arrangements to plan the workshop in January 2017.

I still remember how warmly him and his staff welcomed me and my colleagues in the event of our visit. The technical and scientific quality of the workshop was remarkable and we had an extremely positive feedback from participants. Apart from that, we had the opportunity to observe SAFE facilities and everyday clinical activities, which complied with premium quality standards.

But our visit was not just work: we also appreciated spectacular sightseeings and enjoyed delicious food in very good company.

I congratulate Wiwat once again for this significant milestone in his professional career and I encourage him to keep pursuing improvement and innovation, hoping that we will have further opportunities for new scientific collaborations in the near future.

Bruce Shapiro MD PhD FACOG
Medical Director & Board Certified
Reproductive Specialist

Congratulations on your 15th anniversary!!!

With your 5 clinics, you have the opportunity to help a large number of people with "state of the art" treatment. Keep up the good work!!!

Best regards,

Dr. Shapiro

My dear Wiwat

Congratulations on your 15th Anniversary

You are providing a first rate fertility service and have made SAFE an esteemed and well-like IVF Clinic. I am glad and honoured to know you and your services.

Best wishes

Milton Leong

Dr. Wong Pak Seng

Founder, Director & Fertility Specialist
Sunfert International Fertility Centre

It gives me great pleasure to write a few words to celebrate Safe Fertility Group's 15th Anniversary. Dr. Wiwat Quangkananurug, the founder of this Group is an exceptional clinician with an innovative eye for adopting the latest trend and technology in the ever-changing field of assisted conception.

In 2014 when Sunfert International started our own genetic services, I remembered calling Dr Wiwat to ask about their experience with Next Generation Sequencing (NGS) as their platform for PreImplantation Genetic Testing (PGT). At that time, Safe was one of the pioneers that adopted NGS in the world. Needless to say, the rest is history. NGS is now the most widely used platform.

Safe is also pioneering in many aspects of fertility treatment as well as taking the lead in provision of fertility services in the Thailand. Through the able leadership of Dr Wiwat, the Group has grown with the setting up of other branches.

I would like to congratulate Dr Wiwat and his team for a job well done and may the Group continue to grow and make more babies!

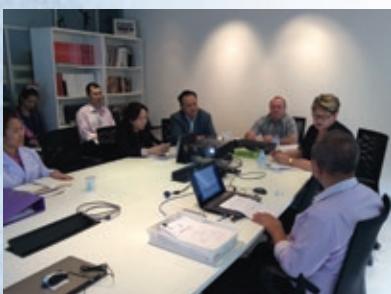

Sally and Jim Catt
Embryologist

A message to Dr Wiwat

We met Dr Wiwat back in 2011 when he attended a Shape-sponsored meeting run by our Education Department of Reproduction and Development, Monash University whereby a group of senior clinicians and embryologists from the Asian subcontinent visited Monash IVF and even had a hands-on session in our EPRD labs with mouse embryos. Being embryologists and trainers of embryology its always great to meet clinicians with a genuine interest and passion on what happens in the laboratory. We have crossed paths and emails many times since then and have both been lucky to have had invitations to visit Dr Wiwat's labs in a professional capacity, while Jim has also attended several accreditation sessions with the Safe Fertility group. We always enjoy Dr Wiwat and his lab staff's hospitality when we visit. Good luck for the next 15 years!

Prof. Koichi Kyono, MD., Ph.D.
President and CEO
Ladies Clinic Kyono

Dear Dr. Wiwat Quangkananurug,

Congratulation on your 15th anniversary. This is an incredible milestone and you deserve the spotlight to celebrate the moment.

I believe that your determination, thoughtfulness, and ambition have taken you this far.

Your sincere dedication in our field is remarkable and it's no doubt that you have brought a lot of happiness to your patients.

In May 2015 you welcomed us to your excellent clinic, which inspired us a lot. At that time you even let my staff study at your lab. In 2 months later, you came along to Japan with your family.

Though it's a short time, we deepened our friendship.

The six years have passed by so quickly that it seems like yesterday.

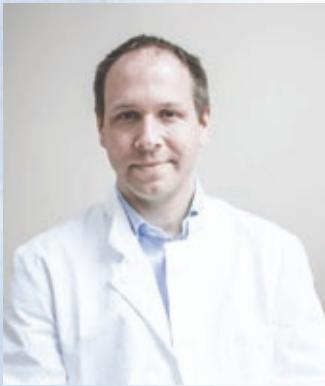

We always wait for your another visit.

Once again let me celebrate your achievement of the past 15 years.

I truly wish you continued success for years to come.

All the best,

Markus Nitzschke, Barcelona
CEO and Founder
NatuVitro Fertility clinic

As one of the leading IVF specialists in Asia, Dr. Wiwat and his SAFE Fertility Group have made significant contributions to the development of our field in Thailand. Countless IVF doctors and embryologists have received training in his clinics, and as a result of his efforts, Thailand is now one of the countries with the highest standards for IVF in the world. The SAFE Fertility Group has grown to become one of Asia's leading organizations thanks to his passion and ability to lead. From Barcelona, Spain, we are sending our warmest congratulations on this significant 15th anniversary and wish you many more years of success and growth.

Prof.Ng Soon Chye
Medical Chairman & Fertility Specialist
Sincere Healthcare Group

Dear Wiwat,
Congratulations! Imagine, 15 years already!

I have known Wiwat (as he is fondly called) when he first started his IVF Centre in 2007. He has always impressed me with his enthusiasm and energy. This has been translated to a successful IVF Centre, which started in Amarin, Bangkok, but then expanded to 5 Centres throughout Thailand. I have been invited to at least 2 of his Centres and have found his staff to be knowledgeable and helpful. There has been good exchange between our centres, especially in the earlier days when PGT-A first started, when many of our patients needed the service but was then not available in Singapore. Whilst the services in both countries have evolved and changed, Wiwat has always been very positive in his outlook. I wish him and SAFE many more wonderful years ahead!

If there are factual errors, eg number of Centres, please feel free to edit and correct. Good luck, and hoping to meeting you again, now that COVID19 is under control.

With best wishes,
SC Ng

Dr. Novero Virgilio
Head, CARMI
St Luke's Medical Center Global City
(Metro Manila)

I first met Dr. Wiwat about a decade ago in an ESHRE meeting. Since then, I've seen how he has successfully expanded his clinic to be able to help many more patients over the years. We send many of the PGT-A tests from our IVF center in Manila to Safe. Congratulations Dr. Wiwat on the 15th year anniversary of Safe Fertility and may you continue to have many more years of service to make more couples happy!

Prof. Richard Choy

Professor Department of Obstetrics and Gynaecology
the Chinese University of Hong Kong

Other Positions:

Deputy Director, Prenatal Genetic Diagnosis Center,
CUHK
Director, Pre-implantation Genetic Diagnosis Laboratory,
CUHK

I was honored to visit Dr Wiwat's labs in a professional capacity since 2015. During the last few visits, I am delighted to see the service development and technology advancement of the Safe Fertility group. We always enjoy scientific exchange with Dr. Wiwat and his lab staff during our professional service development. On your 15th anniversary, I wanted to appreciate and thank you for everything you have done for the patients.

Zhihong Yang, D.V.M., Ph.D.
Co-Founder and Secretary General
International Society of Reproductive
Genetics Irvine, California, USA

Being active members of International Society of Reproductive Genetics (ISRG), American Society of Reproductive Medicine (ASRM) and European Society of Human Reproduction and Embryology (ESHRE), Dr. Wiwat and I have met at the annual conferences of the professional societies over the years. I have also visited the Safe Fertility Center in Bangkok for multiple times and have shared our clinical research data about PGT-A and time-lapse with Dr. Wiwat and his team. Dr. Wiwat's team has set up one of the earliest laboratories for PGT-A with NGS in Asia. Dr. Wiwat and his team have been actively involved in the academic activities of International Society of Reproductive Genetics since 2019. In recognition of his excellent work, Dr. Wiwat has been elected as a Co-Chair of sub-committee of International Society of Reproductive Genetics which consists of a leading group of scientists and physicians in the field.

Dr. Rita Bakshi
Founder and chairperson of the
International Fertility Centre

Lovely hearing from you Dr Wiwat...and your achievements...
My note for your book

Whenever I have found cases which are beyond me... I trust Safe fertility and I have never been disappointed...May God bless your Hands and you

Meishan Jin, PhD
Vice President Market Region Asia
Vitrolife Sweden AB

Dear Dr. Wiwat,

Warm congratulations on the 15th Anniversary of Safe Fertility Center! It has been a great pleasure for Vitrolife to work with the Safe Fertility Center in all these years. Along the way, the achievement made by Safe Fertility Center with the establishment of several IVF clinics in Thailand to carry out a dedicated service to infertile patients has tremendously impressed us. The pioneer mindset of Dr. Wiwat in adapting the state-of-the art technologies to provide world class fertility care with excellence has been surely encouraging the IVF clinics and industries in the field of ART.

We are truly grateful to Dr. Wiwat and everyone at the Safe Fertility Center for being so supportive to Vitrolife in our journey of "supporting the customers to achieve successful treatment outcomes by providing valued solutions and services for assisted reproduction".

Together. All the way.

Futoshi INOUE, MBA, Pharm.D., Ph.D
President and CEO
Kitazato Corporation

Dear Dr. Wiwat,

Congratulations on the 15th anniversary.

Dr. Wiwat is beloved doctor in Japan, as well as in Thailand and his popularity is borderless. I wish you and SAFE FERTILITY GROUP every success.

Alex Price
Chief Executive
Fertility Associates Ltd

"Over the last 15 years, Fertility Associates has seen the continued growth and development of SAFE Fertility Group. As a key clinic group in Thailand, the SAFE team have always had a commitment to introduce new innovations in IVF as they seek to improve outcomes for patients. On the occasion of the 15th anniversary we wish SAFE Fertility Group well on your continued journey."

Regards,

Dr. Shreyas Padgaonkar

M.D., D.G.O., D.N.B.

Director

Shreyas Fertility Center

Mumbai, INDIA

Let me take this opportunity to congratulate Dr. Wiwat and SAFE Fertility group for 15 years of successful service, a remarkable achievement indeed! Your excellence in the field of reproductive medicine is matched by just a few. A patient friendly approach along with cutting edge technology, is the hallmark of the SAFE group. Especially heartening, is your continued cooperation with clinics beyond your borders and your willingness to share knowledge with others. My best wishes to you for still more milestones to achieve and a glorious future.

Sayaka Higo
Embryologist

Dear Dr. Wiwat

Congratulations on this amazing occasion. 15 years of operation in the IVF industry would never come easy. It is my honour to send a congratulatory message to you. Dr. Wiwat, you began the journey by establishing only one clinic in Bangkok, and then with your efforts and dedication over the years, your business soars and you have opened four more clinics in Thailand. You not only provide all the necessary help to the patients, you also grow competent staff and provide so many invaluable job opportunities in your country. Congratulations on your efforts and accomplishments!

I wish you further success in the future.

Lee Shaw Ni, Amy
Embryologist
Centre For Assisted Reproduction
Singapore General Hospital

Dear Dr Wiwat,

I would like to express my gratitude to you for accepting me to undergo a preceptorship with Safe Fertility Centre in 2016 to acquire the necessary skills and knowledge to perform trophectoderm biopsy and cell tubing under the excellent guidance of your chief embryologist, Sujin Chanchamroen.

Thank you for your willingness to share and I truly appreciate everything I have learnt from your Embryology Team.

Congrats and all the best to you and your Team!

Warmest regards,

Chow Wei Chon (Andy)
Lead Embryologist
Sunfert @ Kuching

Dear Dr Wiwat and Sujin,

First of all, it was such an honor to be invited to your clinic in Bangkok for the vitrification training on 2nd of March 2017. Oh my, time does fly.

It was such a valuable insight, to be given opportunity to observe actual procedures that have taken place in the lab. The hands-on trainings were well conducted by the embryologists from Safe Fertility. I was given the opportunity to be able to associate with not just the embryologists from the lab, but also the founder of Safe Fertility himself, Dr. Wiwat.

Dr Wiwat, Sujin and staffs are truly amazing people, who are very enthusiastic in their work. I sincerely wishing all the best to Safe Fertility and congratulation on the publication of your book.

Sunfert has since opened a branch in Kuching, Sarawak, Malaysia. I am now leading the laboratory here, since 2019. It is a smaller center, but we are fully equipped for procedures.

Hoping one day after Covid situation recovered, we would all get the chance to meet again. Until then, please stay safe.

Best regards,

Tham Yu Chou
Embryologist
Pantai Hospital Kuala Lumpur

I would like to express my appreciation and many thanks to wonderful staffs in Safe Fertility Centre who have been provide me a kind support and guidance which enable me to explore more in embryology field. It has been an honour to accept me to be one of your trainee participants during the embryo biopsy training. If other people who seek for training, I would recommend at Safe Fertility Centre as my favorite choice. Thank you.

Regards,

Dr Wei Siang Yu
Chairman
Borderless Healthcare Group

To Dr Wiwat,

More than a decade of dedication in a medical specialty is considered to be just a beginning of a strong foundation for Dr Wiwat. We are looking forward to see how Dr Wiwat is going to transform the fertility management landscape in Thailand under his leadership. Wishing Dr Wiwat all the best in the coming decades.

Dr Wei Siang Yu
Chairman
Borderless Healthcare Group

Safe Fertility Group Medical Center was founded in 2007 under the commitment of Dr. Wiwat Q. an aspiring doctor who specialises in reproductive medicine to help families struggling with fertility problems. We provide an opportunity to fulfill families by using modern medical technology, standards and safety.

At the present, Safe Fertility Group has 5 branches. We provide services with modern technology of high standards and experienced personnel such as reproductive medicine specialists, embryologists, nurses, and personal assistants.

We are the first fertility medical center in Thailand to be certified for IVF clinic standards from RTAC since 2014. In addition, we have been certified by ISO9001:2015 from BSI Thailand. The laboratory has passed quality assessment by UK NEQAS and ISO15189 standard from the Department of Medical Sciences, Ministry of Public Health.

From the 15 years of experience with the vision and determined goals of Safe Fertility Group, more than 10,000 families have been successful, happy and smiling. We continue to strive to continuously improve the quality of service to create the highest satisfaction for every family.

SAFE Milestone

พัฒนาการก้าวสำคัญของ SAFE // การเดินทางของ SAFE // เหตุการณ์สำคัญของ SAFE

2007

- SAFE Fertility Group was founded
ก่อตั้งศูนย์การแพทย์เพื่อการมีบุตร เชฟ เฟอร์กิลต์ กรุ๊ป
- Commencement of the embryo transfer method in the blastocyst stage
เริ่มใช้วิธีการย้ายตัวอ่อนในระยะblastocyst
- Commencement of the pregnancy test on Day 7 after the embryo transfer
เริ่มใช้การตรวจการตั้งครรภ์หลังย้ายตัวอ่อน 7 วัน
- Commencement of Hysteroscopy and Sperm Freezing
เริ่มให้บริการส่องกล้องโพรงมดลูก และการแช่แข็งสเปร์ม

2010

- SAFE Fertility Group Phuket was founded
ก่อตั้งศูนย์การแพทย์เพื่อการมีบุตร เชฟ เฟอร์กิลต์ กรุ๊ป ภูเก็ต

2011

- SAFE Fertility Group Ramindra was founded
ก่อตั้งศูนย์การแพทย์เพื่อการมีบุตร เชฟ เฟอร์กิลต์ กรุ๊ป รามอินทรา
- Accredited by ISO9001
ผ่านการรับรองมาตรฐาน ISO9001
- The 1st in Thailand that commenced analysis embryo with aCGH
ศูนย์การแพทย์เพื่อการมีบุตรแห่งแรกในประเทศไทย ที่ให้บริการตรวจวินิจฉัยพันธุกรรมของตัวอ่อนด้วยวิธี aCGH
- Commencement of Pre-implantation Genetic Testing for Chromosomal Structural Rearrangement (PGT-SR)
เริ่มให้บริการตรวจความผิดปกติของโครโมโซม (PGT-SR)
- Commencement of Vitrification and Egg freezing
เริ่มใช้เทคโนโลยีการแช่แข็งแบบผลึกแก้ว และบริการแช่แข็งไข่

2012

- The 1st in Thailand that commenced EmbryoScope®
ศูนย์การแพทย์เพื่อการมีบุตรแห่งแรกในประเทศไทย ที่ให้บริการตู้เลี้ยงตัวอ่อน EmbryoScope®
- Start PCR for Single gene disorder
เริ่มให้บริการตรวจ PCR สำหรับ โรคถ่ายทอดทางพันธุกรรมที่เกิดจากยีนเดียว

2014

- The 1st in Thailand that use Pre-implantation Genetic Testing for Aneuploidy by Illumina NGS (PGT-A)
ศูนย์การแพทย์เพื่อการมีบุตรแห่งแรกในประเทศไทย ที่ให้บริการการตรวจคัดกรองโครโมโซมกั้ง 24 โครโนโซม ด้วยเทคโนโลยี Illumina NGS (PGT-A)
- The 1st in Thailand that Clinical Embryologist certified by ESHRE
ศูนย์การแพทย์เพื่อการมีบุตรแห่งแรกในประเทศไทย ที่นักวิทยาศาสตร์ได้ผ่านการรับรองจาก ESHRE
- Start MACS Sperm
เริ่มให้บริการตรวจคัดกรองอสุจิโดย MACS Sperm
- SAFE International ART Congress 2014 at Phuket by SAFE Fertility Group (SIART)
งาน SAFE International ART Congress ณ จังหวัดภูเก็ต โดยเชฟ เพอร์กิลต์ กรีป

2015

- The 1st in Thailand that accreditation certified by RTAC (Reproductive Technology Accreditation Certification)
ศูนย์การแพทย์เพื่อการมีบุตรแห่งแรกในประเทศไทย ที่ได้รับการรับรองมาตรฐานคลินิกเด็กหลอดแก้ว จากองค์กร RTAC ประเทศไทยอสเตรเลีย และประเทศไทยแลนด์
- The 1st in Thailand that Clinical Embryologist certified by ESHRE
ศูนย์การแพทย์เพื่อการมีบุตรแห่งแรกในประเทศไทย ที่นักวิทยาศาสตร์ได้ผ่านการรับรองจาก ESHRE
- Start IMSI by Leica 
เริ่มให้บริการตรวจคัดเลือกอสุจิด้วย IMSI by Leica 

2016

- SAFE Fertility Group Khonkaen was founded
ก่อตั้งศูนย์การแพทย์เพื่อการมีบุตร เชฟ เฟอร์กิลตี้ กรุ๊ป ขอนแก่น
- The 1st in Thailand that commenced Karyomapping
ศูนย์การแพทย์เพื่อการมีบุตรแห่งแรกในประเทศไทย ที่ให้บริการ Karyomapping
- Commencement of NIPT with Qualifi by NGG
เริ่มใช้เทคโนโลยีการการตรวจคัดกรองความผิดปกติของโครโนมโซบมาตราณในครรภ์ (NIPT) โดย Qualifi by NGG
- Accredited by ISO15189
ผ่านการรับรองมาตรฐาน ISO15189

2017

- SAFE Fertility Group Khonkaen was founded
ก่อตั้งศูนย์การแพทย์เพื่อการมีบุตร เชฟ เฟอร์กิลตี้ กรุ๊ป ขอนแก่น

2018

- IVF Laboratory was founded at Bangkok-Udon Hospital
ก่อตั้งห้องปฏิบัติการทาง IVF ที่โรงพยาบาลกรุงเทพ-อุดร

2019

- Relocate SAFE Fertility Group Phuket to Bangkok-Siriroj Building
ย้ายที่ตั้งเชฟ เฟอร์กิลตี้ กรุ๊ป ภูเก็ตไปที่อาคารกรุงเทพ-สีริโรว์น

2020

- SAFE Fertility Group Sriracha was founded
ก่อตั้งศูนย์การแพทย์เพื่อการมีบุตร เชฟ เฟอร์กิลตี้ กรุ๊ป ศรีราชา
- Commencement of Rejuvenation Ovarian of Reju O
เริ่มให้บริการเทคโนโลยีฟื้นฟูรังไข่ Reju O

WE ARE The **1st** in Thailand of

1st Accreditation certified by RTAC

ได้รับการรับรองมาตรฐานคลินิกเด็กหลอดแก้วจากองค์กร RTAC

1st Clinical Embryologist certified by ESHRE

นักวิทยาศาสตร์ได้ผ่านการรับรองจาก ESHRE

1st Pre-implantation Genetic Testing for Aneuploidy by Illumina NGS (PGT-A)

คัดกรองโครโมโซมตัวอ่อนทั้ง 24 โครโมโซมด้วยเทคโนโลยี Illumina NGS (PGT-A)

1st EmbryoScope®

ตู้เลี้ยงตัวอ่อนแบบพิเศษ EmbryoScope®

1st Karyomapping

ตรวจคัดกรองพันธุกรรมด้วยเทคโนโลยี Karyomapping

1st aCGH (Array Comparative Genomic Hybridization)

ตรวจวินิจฉัยความผิดปกติทางพันธุกรรมของตัวอ่อนด้วยเทคโนโลยี aCGH (Array Comparative Genomic Hybridization)

ABSTRACT
Objective: our understanding of the nature and reproductive potential of blastocysts associated with triploid embryos (TE) lineage of chromosomal mosaicism is limited. The objective of this study was to first validate copy number variation (CNV) analysis of blastocysts to detect the level of mosaicism and second, determine the nature and level of mosaicism in TE lineage of patient's blastocysts.

Method: 10 biopsy samples were analyzed by array comparative genomic hybridization (CGH) and CNV. Two types of mosaicism between euploid, aneuploid and mosaicism blastocysts

Aspire 2022

The 11th Virtual Congress of the Asia Pacific Initiative on Reproduction
Addressing the Challenges of Human Reproduction | Thursday, 28 April - Sunday, 1 May, 2022

Dear Dr. Wiwat Quangkananurug,

Thank you for accepting our invitation to speak at The 11th Virtual Congress of the Asia Pacific Initiative on Reproduction Congress (ASPIRE 2022), to be held from 28 April – 1 May 2022.

You will find in this document:

- Your Congress Schedule
- Information on Congress registration
- Booking of Technical check session
- Notes on Participation

Aspire 2022

The 11th Virtual Congress of the

(Zoom Webinar)

Chapter 4

SIART and Workshop hosted by SAFE GROUP

Welcome and Congress Opening

Wiwat Quangkananurug

SAFE Fertility and PGD Center, Bangkok, Thailand

dr.wiwat@safefertilitycenter.com

On behalf of the SAFE Fertility and PGD Center and affiliated organizers I would like to express our deepest gratitude to all speakers, poster presenters and participants who accepted our invitation and contributed to the First SAFE International ART Congress.

It is an exceptional event to us, a possibility that has existed only in our dreams for a long time. SAFE Fertility Center was established in Bangkok in 2007. At that time, we had 8 staff, 1 doctor and 200 cycles in the first year. However, we have grown rapidly. Right now, we have 5 centres in Thailand - including one in Phuket -, a total of 7 doctors, over 100 staff and 2,000 cycles a year. 70-80 % of our patients come from overseas, predominantly from Asia, but also from Europe, Australia and the United States.

We offer a wide range of services including IVF/ICSI, PESA and TESE, blastocyst culture in single medium, timelapse follow - up, blastocyst biopsy, PGD with FISH or aCGH (performed at our facilities), and vitrification of embryos and oocytes. We have established an egg banking. In 2013, the average pregnancy rate with fresh embryos was at 40-50%, with vitrified embryos at 60-70 %. Our clinic contributed to 20% of total IVF cycles performed in Thailand, and we are determined to continue the rapid expansion of our contribution. We have established fruitful scientific collaborations with many centres around the world. Although we are still at the beginning of the road, we feel that the fundamentals have been laid down, and from now, we can build up the future.

Returning to our dream: having participated in many infertility conferences we always had the feeling that something was missing. We rambled desperately in the maze of densely packed corridors of mega-convention centers to find the next lecture with potential value. We have seen brilliant ideas sinking in phlegm of incompetent audience, or devastated by aggressive competitors, while the relevant people, these ideas should be addressed to were busy in other sessions. We felt frustrating disappointment that everyone in the world was informed about sensational news announced on exclusive press conferences, while we, participants, were ignorantly lost in the flood of information.

We experienced bitterly the impassable barrier between the elite and the plebs .

We were disappointed because between the impeccable frames and shining appearances the essence was lost .

We were dreaming about a meeting with human scales and friendly measures. Then we started to talk about the possible ways of realization. Inviting a small group of the most creative, most original scientists to a remote place with hidden beauties and tactful intimacy. Avoid parallel sections, board meetings, special workshops, competing events and let everybody get focused on a single event at a time. Encourage invited speakers to talk about their preferred subjects freely, without any formal restrictions or potential consequences. Fill the lecture hall with a sincere and relaxed atmosphere that is typical only on dinners and cocktail parties between small groups of scientists.

Recruit an open-minded and enthusiastic audience who is hungry to acquire new information from authentic sources first hand, and ready to contribute actively in the debates.

Finally, provide a challenging motto to the whole event that is applicable to all subjects and interesting for all participants: Outlining the Future.

So far, everything is on the right track. It was a great honor to us that 97% of invited speakers accepted the invitation - an exceptionally positive feedback at the very beginning, we are very proud of it. Thanks to all scientists who contributed to the edition of our congress book or poster abstracts, thanks to all the organizers for their enthusiastic work and exhibitors who supported this congress. Thanks to our registered guests for trusting us and the value of the SIART Congress. Now, half of the job has been accomplished - the other half depends on you , all of you

Ladies and Gentlemen, it is a great pleasure to declare the First SAFE International ART Congress officially open.

KIDScore D5

When to use it?

- When more good quality blastocysts are available than are planned for transfer
- When deciding which embryos are suitable for biopsy or diagnosis

How does it work?

KIDScore D5 considers the morphology and the morphokinetic traits of an embryo. For each embryo the model calculates a quantitative score from 0 to 10. The higher the score the greater the statistical chance of implantation based on a development information from the first day culture period. The higher the score the greater the statistical chance of implantation. Only a few annotations are required to obtain a score, which further improves the workflow.

KIDScore D5 & Implantation data

KIDScore D5 scores show an increased relative implantation with higher scores. The model is based on a large database of KID blastocysts originating from a wide range of IVF groups.

KIDScore D5 can only be used when culturing under reduced oxygen conditions.

KIDScore D5

KIDScore D5 correlates with increased implantation

KIDScore D5 score	Implantation (%)
